The "eternal return" is an idea for interpreting religious behavior proposed by the historian Mircea Eliade; it is a belief expressed through behavior (sometimes implicitly, but often explicitly) that one is able to become contemporary with or return to the "mythical age" – the time when the events described in one's myths occurred. It should be distinguished from the philosophical concept of ...

Progress in nanotechnology has enabled the synthesis of active particles that can harness chemical energy and translate it into useful work. Catalytic self-propelled motors have implications for understanding out-of-equilibrium systems and have potential applications in active transport at the nanoscale, where they can be used as motors and pumps.
