It really boils down more to a statistical probability of failure. In ASD you treat dead and live loads equally. For example, if you have a case where your dead to live load is 1 to 1 (say 200 kips dead and 200 kips live) the safety factor would be exactly the same as if your dead to live ratio was 1 to 3 (say 100 kips dead and 300

kips live) given the same total load.

Explain ASD vs LRFD to a dumb ME - Structural engineering

STEM Education. Science, technology, engineering, and mathematics (STEM) are cultural achievements that reflect our humanity, power our economy, and constitute fundamental aspects of our lives that contribute to our nation's competitiveness.
