UPDATE 11/20/16. We wrote this article several years ago when trying to source the perfect small wood stove for our Airstream. With this search we found that there was gaps in size, features, output and price with stoves currently on the market. 6 months ago we started our business out of the interested generated from this blog post.

In my previous Going off-grid post I reviewed the question of whether Tesla Powerwalls or overgeneration, considered separately, might allow a UK homeowner with a rooftop solar array to go off-grid. In this post I consider the two in combination. Once more using 10 Mossbank Way as an example I find ...

The structure, or "topology" of a grid can vary depending on the constraints of budget, requirements for system reliability, and the load and generation characteristics. The physical layout is often forced by what land is available and its geology. Distribution networks are divided into two types, radial or network.

@SFun28 Why? The pdf() device is for plotting PDF figures. It is not a device for PDF documents. That is an important distinction, which you seem to be conflating. Your presumption that because pdf() allows for quite sophisticated control of the dimensions of the outputted PDF it is suitable for these document processing tasks is incorrect; it (adding page numbers) might be a basic scenario for ...
