Ling 201 Professor Oiry Fall 2009 1 1. Morphology 1.1. How to do morphological analysis (or any other kind of linguistic analysis) Morphology is the study of word formation – how words are built up from smaller

1.1. How to do morphological analysis (or any other kind

Morphology is a branch of biology dealing with the study of the form and structure of organisms and their specific structural features.. This includes aspects of the outward appearance (shape, structure, colour, pattern, size), i.e. external morphology (or eidonomy), as well as the form and structure of the internal parts like bones and organs, i.e. internal morphology (or anatomy).

Morphology (biology) - Wikipedia

Mathematical morphology (MM) is a theory and technique for the analysis and processing of geometrical structures, based on set theory, lattice theory, topology, and random functions.MM is most commonly applied to digital images, but it can be employed as well on graphs, surface meshes, solids, and many other spatial structures.. Topological and geometrical continuous-space concepts such as ...
