I sometimes find the Java setup on my various Apple devices to be a mystery. Recently, I was trying to get a Java applet to run in the same way on 2 iMacs and my MacBook Air.

Mac OS X Hints - A community-built collection of OS X hints

X.500 is a series of computer networking standards covering electronic directory services. The X.500 series was developed by ITU-T, formerly known as CCITT, and first approved in 1988. The directory services were developed in order to support the requirements of X.400 electronic mail exchange and name lookup. ISO was a partner in developing the standards, incorporating them into the Open ...
